

Circulator #1645

Instructions

Kettle Cleaning

STEP
1

- Thoroughly rinse kettle with warm water at 120°-130°F to remove the bulk of the soil load.

STEP
2

- Dose Rate - 2 Ounce per gallon ratio of water @ 110°-140°F
Circulate the alkaline solution for 20-30 minutes.
Longer cycle for less temperature.

STEP
3

- Drain and thoroughly rinse with water to drain.
- Follow with an acidified rinse CIP CID#1840 or #1832 @ 1 ounce per 5 Gallon to neutralize any alkaline residue and remove any beer stone films.

STEP
4

- Sanitize to Local Codes

Recommendations for Optimal Performance

- Utilization of a caustic accelerator may aid within optimal results
- Oxide SC would be added at a dose rate of 1 ounce per 1 gallon-
The accelerator should be added
- AFTER 1 minute of circulation of alkaline solution cycle
