Bulk-Raw Material

Committed to crafting cleaning blends enabling less chemical use for the environmentally-focused brewer.

The Stone-Leigh Difference

As a local family-owned business, we share common goals with our brewery customers. Our products need to exceed expectations and the customer experience needs to be personalized. Our goal is to build long-term relationships with our customers. This relationship is truly important to all members of the Stone-Leigh family. In today's chemical manufacturing industry, it is dominated by large international conglomerates focused on the organization's bottom line.

Why over 300 brewers have chosen Stone-Leigh Brew Cleaners

Technical Support

Our chemical engineering team is always available to remedy or recommend a resolution to a residue or sanitation issue for our users or future users.

Largest product portfolio in industry

Stone-Leigh Brew Cleaners by its nature is a specialty chemical manufacturer which enables SLBC to offer the largest product portfolio in the brewery industry. Including specific blends for specific processes to minimize the amount of chemicals, time, water, and money.

Cost Savings within shipping methods

Pallet Program Shipping programs – Shipping costs have risen significantly in the last 3 years and potentially will continue. Our goal is focused on minimizing the hazmat shipping cost. We tailor our pallet programs to offer the best value for our customers. We will maximize

the pallets weight and space requirements. We do not use shipping as a revenue source. Moreover, we also allow local customers pick up.

Payment Options

Our payment policies allow for 30-day terms for all our users. We accept credit card payment with no fee, bank transfers, Venmo, PayPal and checks. Please allow us to tailor a program that works for your business.

Sustainability

Less Chemical Focus -Sustainability ... Our goal is to minimize the amount of chemicals used by engineering optimal formulas. We also engineer blends that minimize the number of steps needed in a cleaning CIP. Our goal is less chemical, less plastic drum and less transportation. We clean, recycle and reuse 275G Totes and 55G drums.
